

CALL FOR PAPERS

ACM SIGPLAN International Conference on Functional Programming

Philadelphia, Pennsylvania, USA

May 24–26, 1996

The ACM SIGPLAN International Conference on Functional Programming is a new annual conference combining the established LISP and Functional Programming (LFP) and Functional Programming and Computer Architecture (FPCA) conferences. The conference is sponsored by ACM SIGPLAN in association with IFIP WG 2.8 and will take place in Philadelphia, Pennsylvania as part of the Federated Computing Research Conference.

Papers presented at the conference must describe new ideas or experimental results that have not previously been published. Suggested areas for submissions include (but are not limited to) the following: language design; compilation methods; architectural support and interaction; program analysis and optimization; programming logics; program transformation; semantic foundations; type theory; garbage collection and run-time systems; input/output, control, and store effects; extensions for parallelism, non-determinism, and concurrency; implementation paradigms: direct- and continuation-passing, graph reduction, and data flow; parallel and distributed implementations; applications and case studies; and pedagogy. Languages of interest include established languages such as Lisp, Scheme, Sisal, ML, Haskell, and Id, as well as novel designs in the functional programming tradition.

Authors should submit 13 copies of a full conference paper to the program chair at the address below. The length of the paper should not exceed 12 pages typeset 11 point on 16 point spacing. Papers will be judged on relevance, originality, significance, correctness, and clarity. Each paper should explain its contributions in both general and technical terms, clearly identifying what has been accomplished, saying why it is significant, and comparing it with previous work. Authors should make every effort to make the technical content of their papers understandable to a broad audience. Simultaneous submissions to other conferences will not be accepted. In addition, the following information, for each paper submitted, should be sent by electronic mail to icfp96@cs.indiana.edu: a single postal address and electronic mail address for correspondence and complete title, author, and affiliation information.

Submissions must be received by October 27, 1995. *The program chair will reject all late or excessively long submissions.* Authors will be notified of acceptance or rejection by December 22, 1995. Final versions of accepted papers must be received by the program chair in camera-ready form by January 27, 1996. Authors of accepted papers will be expected to sign ACM copyright release forms. Proceedings will be distributed at the conference and will be available later for purchase from ACM. They will also appear as a special issue of SIGPLAN Notices.

For submission information and other inquiries contact icfp96@cs.indiana.edu. This call for papers and additional information about the conference can be obtained via the world-wide web or anonymous ftp from:

ACM SIGPLAN LISP Pointers Subscription Application

LISP Pointers is a Special Interest Publication of the Special Interest Group on Programming Languages (SIGPLAN). A subscription to *LISP Pointers* does not include membership in any group.

ACM Associate and Student Member Dues include a subscription to the monthly *Communications of the ACM*. You may join as an Associate Member and convert to Voting Member status by requesting a "Self-Certification" form from ACM's Member Services Department.
